PERSONAL PROFILE

As a motivated and dedicated professional, I am eager to transition my career towards Frontend Web Development. My strong programming and web development skills made a versatile candidate for various roles in this field. While my background is in Design Engineering, it has provided valuable insights into work culture and enhanced my problem-solving abilities.

TECHNICAL SKILLS

Languages : JavaScript, HTML, CSS, Java
Libraries/Framework : Bootstrap, React, Redux
Databases : Firebase
Dev. Skills and Tools : Visual Studio Code, Github, DSA (Data Structures and Algorithms), OOPS, Jira, Agile Methodologies.

TRAINING AND CERTIFICATIONS

Full Stack Web Development Trainee (MERN) Dec 2022 - Present
Accio Job Online

- Mastered skills in contemporary front-end technologies like React, Redux, HTML, CSS, Javascript and gained practical experience in web development
- Completed various individual projects, applying my knowledge to create visually appealing, responsive web apps and solved various DSA problems. This allowed me to develop problem-solving and attention to detail.

EDUCATION

Bachelor of Engineering - Mechanical - CGPA 7.62 (76.2%) Jun 2016 - Oct 2020
Saveetha Engineering College Chennai, Tamil Nadu

Intermediate (12th) - M.P.C - 96% Jun 2014 - Mar 2016
Sri Gayatri Junior College Nellore, Andhra Pradesh

EXPERIENCE

Junior Design Engineer July 2021 - Nov 2022
Finetools Chennai, Tamil Nadu

- Creating conceptual 3D models for SPM machines, Jigs-Fixtures and Gauges using CAD softwares i.e., Solid Works, Auto Cad, Siemens NX.
- Attending customer reviews on the project, solving technical issues during design and fabrication.

PROJECTS

Podcast Web Application Tech Stack: React, Java Script, HTML, CSS, Bootstrap, Material UI, Firebase [Deployed Link](#)

- Using React.js, developed all functionalities like podcast creation and edit & delete podcast, intuitive playback controls, and search features, to provide a seamless user experience.
- Utilized Firebase for authentication and efficient data storage, ensuring secure access to user account & data.
- Enhanced user interaction through integration of the Toastify library, Bootstrap, and Material UI for stylish and informative notifications and visuals within the podcast application.

Youtube Clone Using Youtube Data API-v3 Tech Stack: Java Script, HTML, CSS [Deployed Link](#)

- Real-time data fetched from the YouTube Data API including comments, and recommended videos.
- Cloned the most part of the UI design and all the important functionalities like Search, Video Playing etc.

MeShop-Online E-Commerce Application Tech Stack: Java Script, HTML, CSS, Bootstrap [Deployed Link](#)

- Developed MeShop, a dynamic E-Commerce application. Created an intuitive product ordering and payment system
- Integrated a test mode for payment processing using [Razorpay Payments API](#) and Implemented secure user sign-up/login using LocalStorage and token-based authentication.
- Integrated dynamic product showcasing and cart, leveraging JavaScript to enhance interactivity.
